

Downloading SMART Notebook 11 on Your Home Computer

Click the link:

<http://www.smarttech.com/ca/Support/Browse+Support/Download+Software> Choose the Notebook 11 for Windows as shown below. Download the file and then run it to install the software on your home computer or TNB. It will remove SMART Notebook 10 but you will not lose My Content or Galleries saved locally.

The serial number of the SMART Board is found on the back of your SMART Board. If you have already registered your version 10, you will not need to reregister.

If it is the first time downloading, you will need your serial number (found on the back or side of any SMART Board) and you will be emailed the Product Code and Activation Key. Contact Maria Vincelli if you need assistance with this – mvincelli@scdsb.on.ca

Software Hide

SMART Notebook collaborative learning software

SMART Notebook software sets the standard for creating, teaching and managing interactive lessons within a single application. It's also available in a student edition.

Choose a version ▾

- Download SMART Notebook collaborative learning software**

- 10.2 SP1 for Linux
- 9.7 for GoWire

Elementary and Secondary School Networks are being updated July 2012.

Features of SMART Notebook 11

Activity builder – Creates activity objects that react to actions with animations or sound

Embedded web browser – Inserts web browsers directly onto a SMART Notebook software page

Enhanced contextual toolbar – Responds to actions by giving users the required tool choices when they choose a certain object

Crayon – Creates authentic crayon drawings on a SMART Board interactive whiteboard

Customized creative pen – Builds a unique creative pen from any image

Reset page – Brings SMART Notebook software page back to its last saved state to instantly start again

Gesture recognition – Supports four-touch interactivity for the SMART Board 800 series interactive whiteboard and the SMART Board 8070i interactive display. Also recognizes new shake gesture to group or ungroup objects.

Audio recording – Records sounds directly into a file

Shape image fill – Adjusts the size of an image to fit into a specific shape

Updated tables – Supports scaling, moving and interacting within tables more easily

New text engine – Provides improved text formatting and consistency

Fade ink – Fades any regular ink

Full-page frame – Allows borders of the page layout to be displayed
